

To add links for **films or film segments from FILMS ON DEMAND** into your Blackboard site, please do the following:

First, open Blackboard:

Open your course site, and in the left menu, select the Content Area you wish to use (e.g. Course Documents, External Links or a custom content area).

Place your cursor over the BUILD CONTENT button, and scroll down to URL.

Enter the title of the film/film segment in the NAME box.

In the URL box, copy and paste the following prefix:

<http://odin.curry.edu/login?auth=eziproxy&url=>

You are now ready to find the link for your film, which will be added to the above prefix.

Next, leaving Blackboard open, open Films on Demand in a new tab and find your film or segment.

To identify the correct link to your film or segment, scroll down below the film image until you see the URL displayed in a box as shown here:

Select and copy this link.

Return to your Blackboard site and paste the Films on Demand link directly after the prefix you added earlier. There should be *no* spaces between the prefix and the permanent URL.

The combined prefix and film URL will look like this (the prefix is highlighted in yellow here):

<http://odin.curry.edu/login?auth=eziproxy&url=http://digital.films.com/PortalPlaylists.aspx?aid=19661&xtid=42097&luid=91619>

Complete the process (adding descriptive text, making the link available, etc.) and submit.

If you have any questions, please contact Jane Lawless, Electronic Resources Librarian, at jlawless@curry.edu, or (617) 333-2245.
