PINCHERA

Summer Programming

Respondus

RESPONDUS LOCKDOWN BROWSER

Locks down the browser on a computer or tablet.

Students are unable to copy, print, access other applications, or visit other websites during an online exam.

RESPONDUS MONITOR

Students use a webcam to record themselves during an exam.

Only the instructor can review video recordings and the results of the proctoring session.

Respondus Lockdown Browser

- ✓ Assessments are displayed full-screen and cannot be minimized
- ✓ Browser menu and toolbar options are removed, except for Back, Forward, Refresh and Stop
- ✓ Prevents access to other applications including messaging, screen-sharing, virtual machines, and remote desktops
- ✓ Printing, screen capture, copying & pasting functions are disabled
- ✓ Right-click menu options, function keys, keyboard shortcuts and task switching are disabled
- ✓ An assessment cannot be exited until the student submits it for grading

Respondus Monitor

- ✓ Integrates Seamlessly with Canvas
 - ✓ Students access exams within the LMS as they normally would. Instructors do everything within the LMS too, including the post-exam review of proctoring results.
- ✓ "Auto-Launches" from any Browser
 - ✓ After a quick one-time installation, Respondus Monitor will auto-launch from the student's browser (whenever the exam settings require it. Students are then guided through a pre-exam sequence, including a webcam check.

Browser

1. Modified Toolbar- the condensed toolbar includes only Forward, Back, Refresh, and Stop functions.
2. Assessment Mode- assessments are shown full-screen and cannot be minimized, resized, or exited until submitted for grading.
3. Disabled Controls- all printing, keystroke combinations, screen grab, function keys, and right-click menus have been disabled.
4. Links - links to other web servers do not compromise the secure testing environment.
5. Blocked Features&Applications- the Start button (Windows), system tray, and menu bars have been removed.

The screenshot shows a web browser window titled 'Canvas' with a blue header bar. The main content area displays 'Art History Quick Quiz- Requires Respondus LockDown Browser'. Below this, it says 'Started: Aug 26 at 7:36am' and 'Quiz Instructions'. On the right side, there is a 'Questions' sidebar with three items: 'Question 1', 'Question 2', and 'Question 3'. Below the sidebar, the 'Time Elapsed' is shown as '0 Minutes, 2 Seconds'. The main content area contains two questions. 'Question 1' is worth 1 point and asks if Machiavelli is the author of 'Il Principe', which describes the means by which a prince may gain and maintain his power. Below the text is a portrait of Niccolò Machiavelli. There are two radio button options: 'True' (selected) and 'False'. 'Question 2' is also worth 1 point and asks which of the following statements is incorrect about Michelangelo's sculpture of Moses. Below the text are three radio button options: 'Moses was sculpted after David', 'Michelangelo was 40 years old when he sculpted Moses', and 'The sculpture of Moses was originally intended for St. Peter's Basilica'. The browser's address bar and navigation buttons (back, forward, refresh, stop) are visible at the top. The browser's menu bar, system tray, and Start button are missing. Numbered callouts (1-5) point to specific features: 1 points to the browser toolbar, 2 points to the top right corner, 3 points to the question text, 4 points to a link in the question text, and 5 points to the bottom of the browser window.

Monitor

When this feature is enabled for a quiz, students are required to use a webcam and microphone with Lockdown Browser. After the quiz is complete, an instructor can review details of the assessment, even the recorded videos.

Monitor Webcam Settings

- Don't require Respondus Monitor for this exam
- Require Respondus Monitor for this exam
- Either Respondus Monitor or a proctored lab can be used to take this exam

Startup Sequence

The Startup Sequence is the set of optional events that occur before a Monitor webcam session begins. You can add or remove the items to be included in the Startup Sequence, and can edit the text unless it has been locked by the administrator. The order of most items in the startup sequence can be changed using drag and drop.

4. [CANVAS DEMO](#)

Best Practices

Have a practice exam

In Lockdown Browser, a random password is added. Instructors should NOT delete or modify this password; students do not need this password.

Do not enable force completion. This will prevent students from completing the exam in the event of network issues, computer crashes, etc.

Deliver questions one at a time. This prevents potential loading problems, especially in the case of longer exams.

Designate a student to check the browser the night before the exam
