

## Editing

The Panopto Editor lets you modify your recorded video.

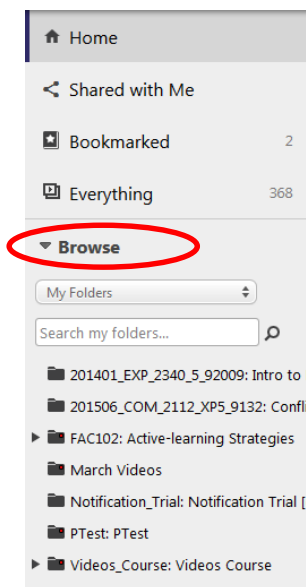

**Step 1:** Go to [currycapture.hosted.panopto.com](http://currycapture.hosted.panopto.com). Choose **Sign in using Blackboard** option.

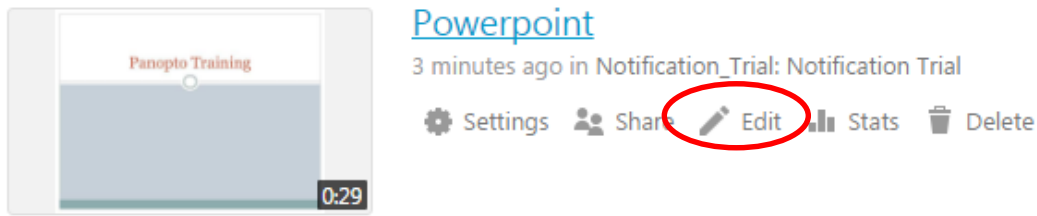

Enter your Blackboard Credentials. Click **Login**.

**Step 3:** On left hand side expand **Browse** and click on the folder that contains the video you would like to edit.

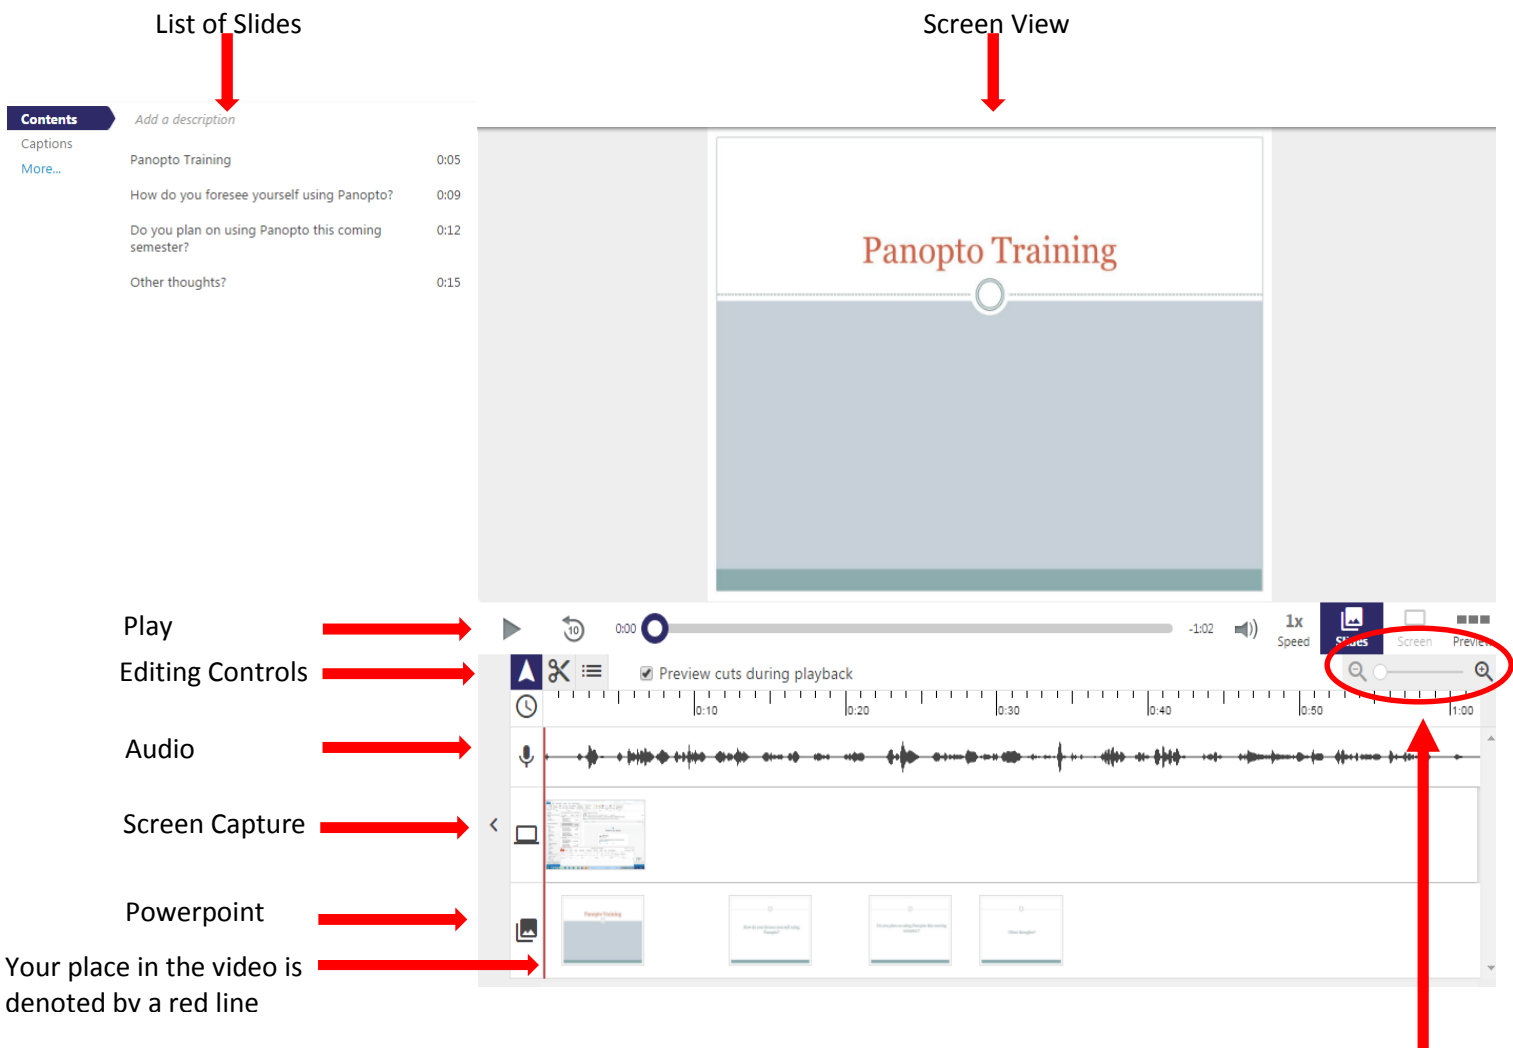

**Step 4:** Find the video you would like edit. Hover your mouse over the name and select **Edit** in the menu that appears below.

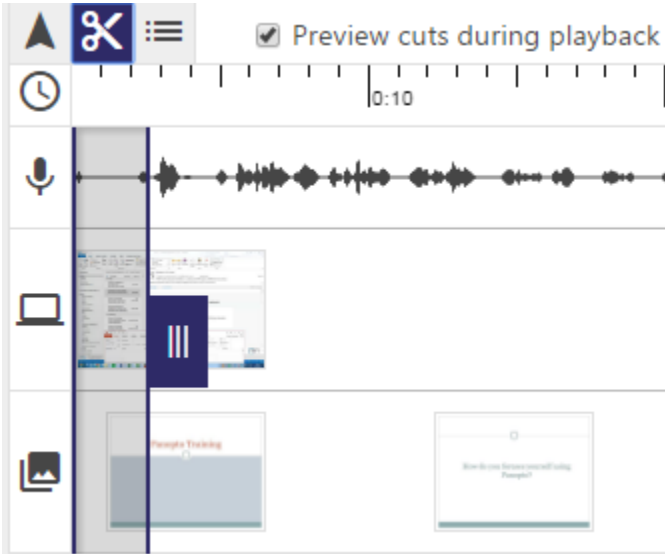

The editing screen will open.

The editing process can be time consuming. It is a process of listening to the video by clicking on the Play button, cutting the section you would like deleted using the Editing Controls, listening to the edit to make sure too much or not enough has been deleted, and repeating these steps until all of the edits you desire have been made.

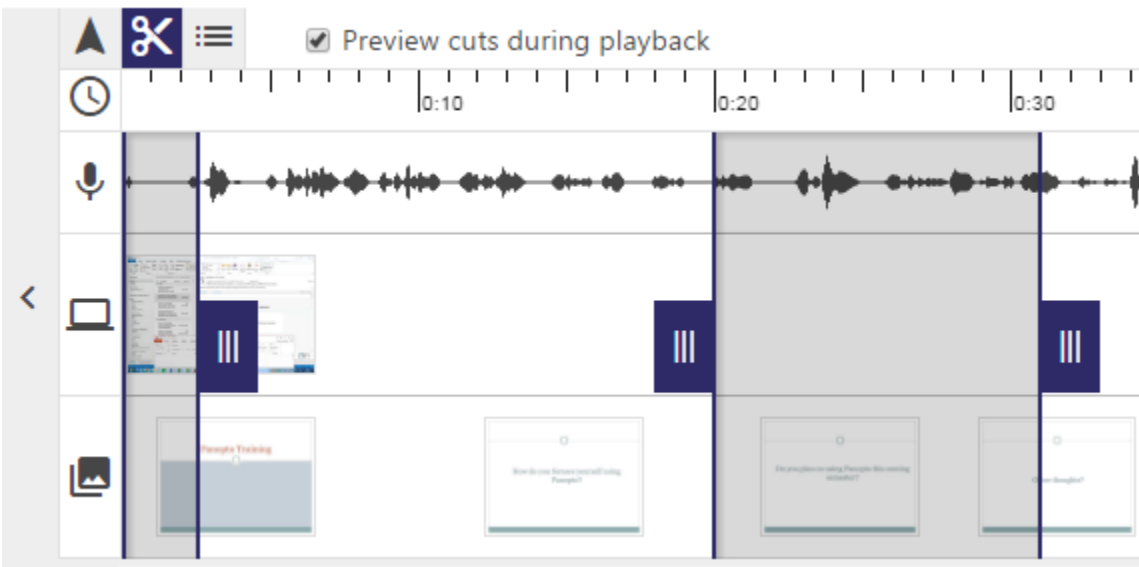

It is recommended that when editing you enlarge the text by clicking on the magnifying glass to make it easier to cut smaller more detailed sections.

**Step 5:** To delete a section of the video from the beginning or end of the presentation click on the scissors and drag the purple bar to the right. The portion that will be edited out is grayed out.

To delete a portion of the presentation from the middle click on the scissors, place your cursor where you would like to start the edit, then click and then drag to the right. If the deleted portion needs to be adjusted drag the handles in either direction.

If you would like to undo a deletion pull one of the handles and until it meets the other handle. The deleted portion will be added back to the presentation.

**Step 7:** When you have completed the edits Click **Publish** in the upper right hand corner.
