What Can I Do With a Major In...

COMPUTER SCIENCE

Computer Scientists design and create the computer systems that organize and simplify our lives every day. They begin with the laws of physics and end up with today's (and tomorrow's) amazing devices that make our world smaller and more interesting.

AREAS AND OPPORTUNITIES

- Application Integration Engineer
- App Training and Development Specialist
- Business Systems Analyst
- Computer Programmer
- Computer Security
- Database Administrator
- Engineering Lab Tech
- Investment Manager
- Logistics Manager
- Market Research Analyst
- Network Admin
- Network Programmer
- Software Engineer
- Statistician
- Technical Support
- Technical Writer
- Video Game Designer
