

To add links for **ebrary ebooks** into your Blackboard site, please do the following:

Open your course site, and in the left menu, select the Content Area you wish to use (e.g. Course Documents, External Links or a custom content area).

Place your cursor over the BUILD CONTENT button, and scroll down to URL.

Enter the title of the resource in the NAME box.

In the URL box, copy and paste the following prefix:

<http://odin.curry.edu/login?url=>

You are now ready to find/add the URL for your ebrary resource.

1. Perform a search in ebrary.
2. Click on the title to open the ebook.
3. Copy the URL in the navigation bar of your browser.
4. Paste the URL into the Blackboard URL box described above, immediately following the prefix.

The combined prefix and document URL will look like this (the prefix is highlighted in yellow here):

<http://odin.curry.edu/login?url=http://site.ebrary.com/lib/curry/docDetail.action?docID=10265299>

Complete the process (adding descriptive text, making the link available, etc.) and submit.

Please note: this prefix above is different from that used for other library resources. Instructions for adding articles from subscription databases (e.g. EBSCO and Gale) can be found in the document entitled LINKING ARTICLES FROM LIBRARY DATABASES IN BLACKBOARD.

If you have any questions, please contact Jane Lawless, Electronic Resources Librarian, at jlawless@curry.edu, or (617) 333-2245.
