Build Content: Atomic Learning

The Atomic Learning feature located under Build Content allows you to embed Atomic Learning tutorials directly into your Blackboard course. Students can click on the specific tutorial from within Blackboard.

Depending on the design of your Blackboard course, you can either use the default Content Areas or add a new Content Area with a name of your choice.

**Step 1:** Go to the CONTENT area of your course by clicking on the navigation button of your choice where you want your students to access the file(s).

Any content area will work to add an Atomic Learning link. Pick one where students might likely think they would find this or make a new navigation button to clarify the files contained within.

**Step 2:** Click on the BUILD CONTENT button in the Content Area. Then click >> ATOMIC LEARNING.
